The novel triblock copolymers of this invention comprise at least one poly(aryl ether) block or a polyether block and at least one poly(aryl ester) block or a polyester block, wherein the poly(aryl ether) and poly(aryl ester) blocks are at least partially or entirely separated from each other by at least one poly(aryl ether) block or polyether block and wherein all of the blocks comprise styrenic segments. Triblock copolymers are characterized by the systematic inclusion of a poly(aryl ether) (PAE) block ABA or ABA' or alternatively AB'A) or AB'A' triblock copolymer which, in turn, is separated from a poly(aryl ester) (PAE) block or ABA triblock copolymer by at least one polyether block or ABA triblock copolymer, wherein A represents the poly(aryl ether) block or the polyether block and B represents the poly(aryl ester) block or the polyester block. For example, a di(styrenic) segment A will block a poly(aryl ester) block. For example, a di(styrenic) segment A will block a poly(aryl ester) block. A segment of poly(styrenic) is defined herein as styrenic to include styrenic compounds having at least one non-aromatic monomer unit. A number of disclosures are known of ABA or ABA' or AB'A triblock copolymers wherein the poly(aryl ether) block and the poly(aryl ester) blocks are not separated

MixerPro.NET Tester is a quick library that allows you to very easily manage and configure any sound card. The main benefits are that it is very easy to quickly access to a list of audio devices and controls through easy interface and also the most important it has a very nice simple structure that allows you to quickly read and write all the controls of your device. You can use MixerPro.NET Tester to read the configuration of your sound cards. You can read and / or modify the main, mixer and effects controls. With this tools you can quickly change the volume, the balance and the output to each sound card, read the settings or even modify them. MixerPro.NET Tester is composed by 2 parts: the first one will allow you to simply access to a list of audio devices, and the second one is the real library that allows you to control each device in order to change the settings and access to the controls. Try out Mp3splt.net To make a musical activity, the best thing you can do is to write a music. What you will need for this? A computer, a microphone, a way of recording and saving audio files. If you are not aware of how to record a musical activity, you will find plenty of help about recording on the Internet. Once you are well equipped, you will need to make a focus on the basics: in a computer, you need a sound card, a microphone and an operating system Finding a sound card Find a sound card (or connect an external interface) that can handle audio files. With your external interface connected to your computer and the microphone plugged in, we are ready to start. Recording a Musical Activity with audio recording and audio editing tools: Use a microphone and/or a good external interface for recording audio files. Once you've recorded some audio files, save them in a folder. Lets name this folder as music (or whatever you like). Audio editing Open your music folder. In Audacity (for example), find the audio wave files and save them with the right format. I have
